

Historic House

Date

2022

Primary Maker

Beatriz Cortez

Medium

Steel fireplace structure; 4 steel and aluminum vessels; concrete base

Description

Historic House is imagined as a life size section of a house: the hearth and chimney and 4 small domestic vessels. It is made with sealed and treated steel to ensure that it will not oxidize and damage the lawn. The highest part of the sculpture, the chimney, will be 9.5 ft. tall. The footprint of the fireplace will be 4x5 ft and the structure will weigh 500 lbs and will be assembled and bolted in

place. It will be secured from inside with bolts (not visible to viewers) to a pre-prepared concrete base of 6x6 ft., which will be covered in an earth-like mulch to replicate a dirt floor. 4 small household objects also made of sealed and treated steel, will also be bolted to the concrete base in front of the fireplace so they cannot be moved.

Dimensions

9 1/2 × 4 × 5 ft (289.5 × 121.9 × 152.4 cm) Poured Concrete Base: 6 × 6 ft (182.9 × 182.9 cm) Weight: 500 lb. (226.8 kg)
